

4th Quarter 2009

Arielsys Technologies welcomes our new Mega Pixel Security IP Camera Line. Now up to 5.0 mega pixels. These professional series IP cameras are very high quality, well built and feature packed. Supports 64 independent video streams, multistreaming with low band width, power over ethernet, low lights and on camera backup recording as well as to NVR.

With over a decade of experience in megapixel IP video for surveillance, IQinVision has plenty of news to share. We are proud of the innovation that we continue to deliver in the IQeye line of megapixel IP cameras and accessories. Our high-resolution security camera systems set the standards for the new generation of security cameras. We continue to listen to our customers and prove it each time a new IQeye camera is released to the market, with features that make installation simple and analytics that give the customer multiple options for customized surveillance solutions. IQeye, for when you can't afford to miss a thing!

IQinVision released the very first IP camera to market in "1999", IQinVision was first to market with HDTV and megapixel cameras and has received numerous awards from Frost & Sullivan, ST&D, Detektor, IIPSEC, and others. We continue to produce innovative security camera solutions and we can prove it!

Arielsys Technologies is the chosen integrator for the state of Alabama and Tennessee.
